

**Thomson
Automation**

Landing Light

Warm-White Power-LED
20mm lens diameter

User's Guide

Introduction

The Thomson Automation landing light is a perfect accessory for our landing gear controllers. You can connect one directly to our LGCII. Two can be connected with a splitter cable. For use with our LGCI, a driver and cables are available. An integral heat sink provides cooling for the LED. For applications above 0.5 watt, cooling air flow must be provided.

Also available without lens.

Specifications

Name	Landing Light
Part nr.	1098LL
Supply Voltage	Direct connection to 3W power LED
Supply current	100 to 250 ma
Weight	5 gm
Size	Lens Diameter: 20 mm, Length 18 mm
Cable Length	30 cm
